Improve engineering discipline and delivery quality								
Description								
Improve engineering discipline and delivery quality by: 1. Conducting effective code reviews, code management processes, design and testing best practices 2. Adopt open source coding and development practices wherever appropriate 3. Effectively demo features or user story acceptance criteria to PO 4. Manage knowledge artifacts using Wiki								
Comments								
As part of standard development practices, code reviews are performed before merging code to develop. New implementations and solutions are discussed with leads and Architect team before implementing (for example, Formulary pagination and EOB pagination filter changes). Code is then delivered to QE for testing though email communication after deploying and unit testing the changes.								
The team uses open source Hapi Fair framework for FLEX resource development and Angular JS for portal changes. All code developments are performed using open source tools like Visual studio code.								
EOB, Formulary changes were demoed in CMS demos.								
Managed config updates in wiki and SharePoint.								
Shilpa consistently contributes towards the scrum team delivery by being very accountable and manages assignments and meets deadlines without supervision. Another factor that has contributed towards the success of the team is her persistent and dedicated nature, which allows her to manage distractions while staying focused on tasks in order to ensure timely and high quality delivery.

Business Goals							
Title	Goal Category:	1	2	3	4	5	N/A
Agile Development Practices							
Description							
Work with the Product Owner to ensure features and user stories are broken down into manageable deliverables. Attend and contribute in all agile meetings - daily stand ups, sprint retrospectives, backlog refinements, all developer meetings, user-story acceptance demos CMS demos Partner with the PO to ensure that dependencies on other teams are known/discussed and any "tech" features are tracked.							
Comments							
Worked with the PO to ensure that features and user stories are broken down into manageable deliverables. Attended and contributed to meetings - daily stand ups, sprint retrospectives, backlog refinements, all developer meetings, user-story acceptance demos, CMS demos. Partnered with the PO to ensure that dependencies on other teams were known/discussed and any "tech" features were tracked.							
Shilpa consistently adds value to the team, anticipates issues before they arise and has takes the initiative in seeking out solutions. She collaborates well with others on the team and inspires others to maintain reliability in meeting deadlines through example.							
Title	Goal Category:	1	2	3	4	5	N/A
Improve Client Satisfaction							
Description							
Focus on improving culture and client satisfaction by partnering with the Product Owner and help shape expectations. Contribute to and ensure accuracy of content in customer release notes.							
Comments							
Worked with PO in shaping Claims expectations and contributed to release note content for EOB and Formulary.							
Shilpa consistently provides support to the team and is able to handle multiple deliverables. Shilpa has helped out the FHIRStarters team as needed in order to resolve client issues and reviews/contributes towards the content of the team release notes that go to the clients.

Evaluation Summary

1	2	3	4	5
---	---	---	---	---

Shilpa is a valued team member of the FLEX Platform Team and did a good job with scrum team activities and supporting the FHIRStarters client-facing team. Shilpa's strengths are:

Providing Support

- Shilpa is very knowledgeable about the code and is always willing to help and assist other team members. Shilpa has helped with environment issues, reviewed code changes and is friendly to work with. She has supported new team members and provided support when required.

Accountability

- Shilpa has completed her dev work/user stories proactively and on time and also she has collaborated with other scrum teams which are impacted by the same code. Shilpa held working sessions with the PO, DA and QE to make sure her code has implemented correct requirements before deploying it.

Collaboration

- Shilpa has a great working relationship with all the team members and has helped new team members with knowledge transfer and support.

Persistence/Dedication

- Shilpa has been a valuable resource in the FHIRPILL team. She can quickly onboard and be a hands on resource with knowledge of new technologies and tools. Shilpa has been flexible in her work hours, working early hours as FHIRPILL resources are mostly OGS resources.

An area of opportunity for Shilpa throughout this year is to show an eagerness to take risks in order to stretch herself and have others on the team look to her in more of a lead role. Shilpa should continue with FHIR trainings and work on her ability to lay out her agenda with confidence and hone in on her communication skills with leaders outside of her scrum team.
